## PROJECTS

**Appointment Assistant** *React, Mongo DB, AWS, Docker, ExpressJS*

<https://github.com/KrishnarajT/Appointment-Assistant>

This was a project we made for our University, to facilitate appointment creation system between professors, and their Seniors, as well as students and the Dean. A timetable with many slots per day are assigned to each Professor, and they can request or deny appointments from each other systematically with real time notifications using Web Sockets.

**Anti Brutus** *React, TailwindCSS, SQLite, ExpressJS*

<https://anti-brutus.vercel.app/>

A Password Manager, and Generator, built with Security and Encryption in mind. Project for our Full Stack Development Course.
